French (native) · English (fluent) · German (bonus)
www.leagiezek.design

Design & Creative Leader, from brand to product, from R&D to every touchpoint. 15 years across brand, retail, agency and product, the last 10+ in a research-driven global healthcare group.

Governance Finalist, Design System Awards 2025

MOVING DESIGN PRACTICE FORWARD

Trusted from the front line to the top. Navigating and aligning a complex global matrix; eight years working with senior executives and leading design investment cases.

One identity, every channel. Translating and evolving brands from physical to digital: spaces, events, campaigns, sites and products.

VP-level scope
€1M+ budget
A team of 9
Time-to-launch ÷3
810+ days saved

Adopted, not imposed. One experience system across 45+ products and platforms. 100% adoption in Sanofi's 3 strategic Digital Accelerators (Commercial, Manufacturing, R&D).

Influence over headcount. From 0 to 35+ contributors with the same team. 2,000+ practitioners in the ecosystem.

Cultivating practice, not just systems, through Design Leadership and Community Building.

Experience

NOV 2023 - NOW | SANOFI

Elements Experience System Director

Leading Elements, Sanofi's unified experience system: one design language connecting brand and product across 45+ digital products and platforms in production worldwide, from employee to patient (B2C, B2B, E2E).

Investment case: Authored the annual financial business case for the Elements Experience Platform, validated each year by the Chief Digital Officer (Executive Committee), and the quarterly business-impact reporting; presented platform progress and next steps to the CDO in field sessions within the Digital Accelerators.

Executive alignment: Aligned the CDO's leadership team - Heads of Consumer Experience, Engineering and the 3 Digital Accelerators - on joint priorities, in quarterly reviews and 1:1s as priorities shifted.

Vision & strategy: Set the multi-year strategy and roadmap, extended Elements to native apps, emailing and a content system, connecting brand and product for the first time.

Organisation & people: Owned €1M+ a year, from arbitration to forecast and monitoring. Secured permanent internal positions in place of freelance roles and built a core team of 9, organised by capability with accountable leads.

Influence & community: Partnering with the Experience Design Organisation of 100, including 30+ product designers. A core interdisciplinary community of 300+ across 5 global hubs, from 0 to 35+ contributors in 18 months through inner-source governance, 4.7/5 satisfaction score.

Business impact: 87% component usage per product, time-to-launch cut by 3 on strategic launches such as Beyfortus, 810+ development days saved.

Innovation: Led AI-readiness for the design system and across the design-to-code pipeline: internal MCP, Figma AI Companion, Claude Skills, GitHub pilots.

Design systems ship standards. Experience systems grow culture. That's my leadership bet.

I believe in people to move systems forward. Not the other way around. **Never alone, always.**

Moving from traditional DesignOps to something more human: **one platform of shared practices**, built on trust and humility.

Brand consistency under constraint, without compromising its expression: **that's the system's job.**

Complexity turned simple: that's what a seamless brand experience looks like.

Skills

Experiences that scale

Brand strategy
Creative direction
Channel-agnostic foundations
Design systems

Design-to-code pipelines
Responsible design
Accessibility (WCAG)

Non-negotiables

Human-first
Inclusion as infrastructure
Trust over control
Team health

APR 2021 - OCT 2023 | SANOFI

Product Design Lead · Elements, founded from zero

Executive partnership: Built and presented the design system case to move Elements from an agency model to a fully in-house team, from design to engineering, approved by the Chief Digital Officer, with the backing of the Head of Design.

Build: Rebuilt the design system foundations, Figma kit, React repositories and documentation from scratch in under a year, with a core Elements team of 2 designers and 4 engineers, fully WCAG AA compliant.

Digital transformation: Drove adoption across Sanofi's first commercial Digital Accelerator, launched by the Chief Digital Officer as the group shifted to an agile, product-based organisation.

Brand & corporate experience: Led the sanofi.com redesign in partnership with the Head of Corporate Communications: Information Architecture simplified by 60%, CMS overhaul for content owners.

People: Responsible for 3 product designers across parallel products, as the design-quality interface with their product owners, including mentorship.

MAR 2018 - APR 2021 | SANOFI

Digital Communications Service Owner · Brand platform

Executive partnership: Advised the Heads of Digital for Vaccines, R&D and Medical on their communication plans. Monthly and quarterly updates to their Executive Committee member, and annual employee campaigns per business unit - 100,000+ employees reached.

Brand & identity: Created and owned the Sanofi IT brand platform, sponsored by the Chief Digital Officer: identity, guidelines, templates and asset system for 2,500+ digital employees.

Innovation & engagement: Led communications, from strategy to visual production, including Sanofi's first Captivate hackathon, sponsored by the Chief Medical Officer and the Global Head of Research and Development: 6,000 participants, 103 ideas, 8,301 votes and one idea shipped as the Theia® app.

OCT 2016 - MAR 2018 | MICROPOLE FOR SANOFI

Digital Consultant · Internal communications

Executive partnership: Co-organised the annual seminar of Sanofi's top 150 digital leaders, with sign-off directly from the Chief Digital Officer. Visual production, scenography, agenda and stakeholder orchestration. Helped digital leaders turn complex strategic topics into simple, compelling stories.

Brand & experience: Led brand identity and experience for Sanofi's booths at European events such as VivaTech, with Corporate Communications.

Method: Industrialised the campaign methodology across the digital organisation - reusable templates, toolkits, performance tracking.

2011 - 2016 | EARLY CAREER

Brand, retail, agency and first steps at Sanofi

Sanofi Digital (2015 – 2016): Creative assets and space branding for the IT department; UX and information architecture for the IT intranet.

Lowepro & JOBY (2014 – 2015): Brand communication for two consumer brands, B2B and B2C - launch campaigns, retail assets, trade-show space branding (Salon de la Photo Paris), social media management, first UX work on the e-commerce site.

Decathlon (2011 – 2014): Ran one of the store's three highest-revenue departments - merchandising, in-store activation, customer events resulting in +17% sales revenue in 2 years.

Caribou Agency (2012): Omnichannel loyalty campaigns for three client accounts, bridging operations between creatives and clients.

The human behind the career

I have a soft spot for **candour, bold colours, Bauhaus, co-op and visual board games**, eating a good **cheesy burger in front of a Ghibli film**, or simply **show jumping** with my **horse**. I have no patience for hypocrisy, injustice or Rainbow Road in Mario Kart.

Education

NN/g UX Certification in Design Management & Strategy
Master's degree (top of class) in Brand Management (Sup de Pub)
Master's degree in Digital Advertising (INSEEC)
Bachelor in Business Management (ESCEM), incl. 6 months at Hochschule Pforzheim (Germany) - **Creative Advertising track**
